

A Natural Health-Supporting Breakthrough

More people are learning that Myshroom mushrooms have a mix of special chemistry which benefits the body's ability to fight and prevent chronic diseases. In ancient texts originating in China over thousands of years ago is recorded that various species of mushrooms were used to treat various illnesses. We have found hybrid mushroom strains from universities that possess health supporting chemistry, and are considered "medicinal." Myshroom® products include proprietary blends of hybrid-strains of extreme-quality medicinal mushrooms created in the labs of universities targeted to support the Immune and nervous systems. These products are the ultimate natural health improvement solution. Add the powder blends to your favorite foods and drinks to support your health, fitness, and life.

The Science behind MyShroom®

- During the growing process, the mushrooms exude proteins to digest food from our pure organic substrates
- The natural chemistry contains beneficial enzymes, proteins, polysaccharides, acid molecules and all the essential amino acids
- The chemistry found in the mushroom blends stimulates your immune and nervous system to support your body's chemistry
- Acid molecules have been shown to break down the membrane causing apoptosis of gram-negative bacteria and viruses which may be resistant to antibiotics
- The chemistry found in the mushrooms supports improved flow of glucose, adrenaline, and insulin into human cells
- Myshroom blends support improved cholesterol levels, ATP production in all cells, dilation of blood vessels and the absorption of free radicals
- Myshroom blends consist of 100% rare medicinal mushroom strains
- Medicinal mushrooms are a safe food to consume by the FDA
